

Rain Bird R-Van Adjustable Arc Nozzle - 13-18 ft RGA84660

Details

Get ready for the next generation in nozzle design. The R-VAN line is engineered to deliver the most efficient coverage while making installation and maintenance faster and easier. Rotary nozzles have evolved. It's time to move irrigation forward. It's time to advance with R-VAN. Rain Bird R-VAN Adjustable Rotary Nozzles save more water, are easier to use, and are lower priced compared to leading rotating nozzles. R-VAN's thick streams and large water droplets cut through the wind to deliver water where you want it. R-VAN's are easier to use thanks to its hand-adjustable arc and radius. R-VAN's are also 23% lower list priced and require half the SKUs to achieve 45 degree to 360 degree coverage versus the leading rotating nozzle brand.

Specifications

Manufacturer	Rain Bird
Manufacturer's	R-VAN18
Model No	
Box Quantity	50
Package Quantity	1
